

Permanent Field Infrastructure for Public-Interest Science

OLD GLORY PEAK / MORONGO VALLEY / SAN BERNARDINO COUNTY, CALIFORNIA / EST. 2026

THE OPPORTUNITY

Build what must last. Whole Body Foundation is planning land acquisition, permanent wooden infrastructure, and a field station for multidisciplinary research in the high desert of Southern California. The model prioritizes ownership, durable construction, and open evidence.

WHAT WE'RE BUILDING

PHASE 1 - TETRAHEDRON GARDEN

- 12 triangular raised beds in a Flower of Life pattern.
- 1,000-gallon copper cistern, solar gnomon, orchard ring, and 6 cold frames.
- Planning range: \$8,000-\$12,000 / Target duration: 90 days.

PHASE 2 - FOUR ELEMENTAL DOMES

- Four 10-foot, 2V Douglas fir domes for EARTH, FIRE, AIR, and WATER practices.
- Hardwood dowel joinery and hide glue; no metal fasteners.
- Planning range: \$700-\$900 per dome / 8 weeks per structure.

PHASE 3 - DODECAHEDRON GREAT HALL

- 50-75 person wooden hall with nonagonal base and copper-paneled acoustic dome.
- Three seating tiers, stained glass, and a central presentation platform.
- Planning range: \$150,000-\$200,000 / Target duration: 6 months.

PHASE 4 - QUINCUNX RESIDENTIAL CLUSTERS

- Two clusters of six wooden dome homes, each centered on a pool.
- Privacy landscape, shared decks, fire areas, and desert-adapted planting.
- Planning range: \$35,000-\$45,000 per home / 3 months per home.

TOTAL INITIAL CAMPUS BUILDOUT

\$750K-\$1.2M

We do not rent what we can own. We do not lease what we can build.

The long-term objective is durable field infrastructure that compounds research, training, and community value over time.

THE RESEARCH MODEL

Every claim backed by a mechanism. Every measurement tied to a GPS coordinate. Every dataset open and reproducible.

1 / ENVIRONMENTAL GEOPHYSICS

- Magnetometer transects calibrated against USGS aeromagnetic data.
- Four survey lines across the Pinto, Morongo Valley, and Emerson/Landers fault systems.
- Rock identification and water testing for ORP, pH, heavy metals, and mineral content.

2 / COMMUNITY PSYCHOPHYSIOLOGY

- Planned Polar H10 HRV/RMSSD recordings and monthly salivary cortisol collection.
- IRB review is required before enrollment or data collection; protocol pre-registration will follow approval.

3 / NETWORK AND SYSTEMS SCIENCE

- Decision latency, local economic velocity, and fractal scaling of community networks.
- Open-data release is planned under CC-BY, including negative results.

CURRENT STATUS / JULY 2026

- **LIVE:** wholebody.foundation and the Foundation grant site.
- **COMPLETE:** locked master-plan render package.
- **IMPLEMENTED:** procedural Phase 1 interactive garden model.
- **PENDING:** Explorers Club Rising Explorer grant (\$2K; Aug. 31, 2026 deadline).
- **INQUIRY:** fiscal sponsorship discussions.
- **PHASE 0:** Morongo Valley land search.

FUNDING REQUIREMENTS

FIRST-YEAR OPERATIONS - \$75,000

- Field personnel: \$45,000 / Equipment: \$15,000.
- Data stewardship: \$5,000 / Insurance, permits, legal: \$8,000.
- Documentation and website maintenance: \$2,000.

FIVE-YEAR CAMPUS PLAN - \$1,200,000

- Land acquisition: \$400,000 / Phase 1-2 construction: \$150,000.
- Great Hall: \$200,000 / 12-home residential program: \$450,000.

PRIMARY FUNDING PATHS

- CalEPA Environmental Justice grants: \$50K-\$500K.
- Explorers Club Rising Explorer: \$2,000.
- Private donors, community supporters, and in-kind land contributions.

Planning ranges are preliminary and subject to site control, engineering, permitting, insurance, contractor pricing, and regulatory review. No human-subject research begins without required approval.
